

I support media diversity

Please take note that as an american citizen I am deeply disturbed that the choices that you are making will lower the standard of living for all those that work and live in the US. These moves that you are suggesting will take years to rectify. I am sorry that my needs to be a well educated adult offend you. The way of corporate media has done nothing but turn me into a dummed down human. Are you not afraid of the results of such control. Life at some point may become full of torment and shame. If this happens do you want to deal with the issues that surround this complex problem. Sincerely, Becky P.S. free the media
